REMARKS

Claim 74 has been amended to correct a typographical error.

Although numerous claims have been added, claims 75-78 are representative because the claims are largely repetitive. New dependent claims have been added to recite a preferred genus of VEGF-C polynucleotides for use according to the invention. These claims find support in the paragraph bridging pages 5-6, and the last paragraph of page 7, for example. New dependent claims also have been added that are analogous to claims 73-74. No new independent claims have been introduced.

The Patent Office may charge any fees associated with this amendment to Deposit Account No. 13-2855.

Respectfully submitted,

MARSHALL, GERSTEIN & BORUN
